## Proposed VDI client and plugin version enforcements for 2026

To aid with longer-term testing and updating processes extending beyond the 90-day notice for the next specific versions to be enforced, Zoom is providing a list of VDI client and plugin versions we anticipate enforcing for each upcoming quarterly lifecycle for the upcoming year.

**Important note:** These versions are only a proposal, and the final enforcement versions may vary due to further stability and security considerations. We will strive to ensure the final enforced version is the same or below the proposed version listed here.

Quarterly lifecycle enforcement	Proposed VDI client version	Proposed VDI plugin version
February 2026	5.17.5	5.15.10
May 2026	5.17.5	5.15.10
August 2026	5.17.5	5.15.10
November 2026	5.17.5	5.15.10

The chosen VDI plugin version will trail the VDI client version to assist customers needing additional time to update VDI plugins.
